

Create a Spotify playlist from best recommendations of songs you choose. First, give the playlist a name. It works best when the playlist has a theme, what kind of vibes are you feeling?

Your New Playlist Name

My smooth tunes for the dunes..

Then, use the search bar to find songs and select them into the playlist. After adding the songs, rate each song individually according to playlist relevance where:

- 1 = The song is good but just here for the sake of harmony
- 3 = Great song and would like to hear more, it moderately characterizes this playlist
- 5 = Love the song and really want to hear more, it strongly characterizes this playlist

The small catch here, there must be at least two of each number rating and at least 6 songs.  
Happy Playlisting!

Blinding Lights

Blinding Lights by The Weeknd	5	+	<div>x</div>
